Reading Tiered Fidelity Inventory (R-TFI) Elementary-Level Edition

Introduction and Purpose:

The purpose of the Reading Tiered Fidelity Inventory (R-TFI) Elementary-Level Edition is to provide School Leadership Teams with a tool to assess the implementation of a **School-Wide Reading Model**.

School-Wide Reading Model: Multi-tiered structures encompassing: (1) evidence-based practices focused on the Big Ideas of Reading designed to improve reading outcomes for all students; (2) systems to address the continuum of reading needs across the student body; and (3) data use and analysis.

The R-TFI is designed for use within a data-based decision-making process in coordination with student outcome data. The R-TFI currently measures three domains and 12 subscales.

| Tier | Subscale | Items |
|--------------------------------|-----------------------------|--|
| Tier 1 School- Wide Reading | Teams | 1.1, 1.2, 1.3, 1.4, 1.5 |
| Model Features | Implementation | 1.6, 1.7, 1.8, 1.9, 1.10, 1.11 |
| | Resources | 1.12, 1.13, 1.14, 1.15, 1.16, 1.17 |
| | Evaluation | 1.18, 1.19, 1.20, 1.21, 1.22, 1.23, 1.24, 1.25, 1.26, 1.27 |
| Tier 2 School- Wide Reading | Teams | 2.1, 2.2 |
| Model Features | Intervention Implementation | 2.3, 2.4, 2.5, 2.6 |
| | Resources | 2.7, 2.8 |
| | Evaluation | 2.9, 2.10, 2.11, 2.12, 2.13, 2.14 |
| Tier 3 School- Wide Reading | Teams | 3.1, 3.2, 3.3, 3.4 |
| Model Features | Intervention Implementation | 3.5, 3.6, 3.7 |
| | Resources | 3.8 |
| | Evaluation | 3.9, 3.10, 3.11, 3.12 |

Note: Definitions of the domains, subscales, and all bolded words in text throughout the tool are provided in the Glossary of Terms at the end of this document.

Participants for R-TFI Administration:

It is recommended that all members of the **School Leadership Team** actively participate in the completion of the R-TFI. Involvement of the entire team will result in: (1) a more accurate assessment, (2) a greater understanding of the school's strengths and weaknesses regarding implementation of effective reading instruction, and (3) greater ownership of the improvement process.

Schedule of R-TFI Administration:

For the first R-TFI administration, a **School Leadership Team** can choose to complete just the **Tier** 1 section, or all three tiers. It is not recommended that the **Tiers 2** and **Tier 3** sections be completed until the Tier 1 section has also been completed.

- If a school is participating in a professional learning series that provides separate sessions for Tier 1 than Tiers 2 & 3, the School Leadership Team might consider completing the Tier 1 section of the R-TFI with the Tier 1 professional learning and waiting to complete the Tiers 2 & 3 section until the related professional learning is provided.
- Alternatively, a school could complete the entire R-TFI at once in order to establish
 baseline levels of implementation for Tiers 1, 2 & 3. The resulting data could be used to
 target and prioritize areas for professional development.

After the first assessment, it is recommended that the R-TFI be completed at least once per school year, typically in the spring. It is ideal to coordinate the timing of the completion of the R-TFI with the school improvement planning process so that results can inform the School Improvement Plan.

Process:

Completion of the R-TFI includes critical activities before, during, and after the administration. Before:

- Schedule 1-2 hours with the School Leadership Team for the completion of the R-TFI. A
 typical administration takes about 1-2.5 hours, depending on whether it is the first
 administration and whether the team is completing the entire R-TFI or just Tier 1.
- Select individuals to perform the key roles and responsibilities.
- Print complete copies of the R-TFI for all participants.
- Gather all available resources identified in the Data Source column.

During:

- Introduce the purpose of the R-TFI to all participants.
- Provide an overview of the administration process and scoring procedures.
- Read each item aloud and provide any clarification, including definitions of key terms.
- Facilitate the discussion and consensus on scoring.
- Record the score and notes for each item (paper copy and in the MiBLSi database).

After:

- Generate the R-TFI item report and analyze scores in the Analysis of School-Wide Data Report (MiBLSi database).
- Plan improvements to the School-Wide Reading Model based on the results.

Key Roles and Responsibilities:

| Role | Responsibility |
|-------------------|---|
| R-TFI Facilitator | Individual who is knowledgeable about the implementation of a School-Wide Reading Model The facilitator is responsible for leading the discussion and adhering to the R-TFI administration protocol. When possible, it is helpful for the facilitator to be external to the school. |
| Note Taker | Records scores, ideas shared for planning, and any questions/issues that are raised during administration, and enters scores into the MiBLSi database. |
| Respondents | Team members and other staff intentionally selected for their knowledge and experience with implementing the School-Wide Reading Model. |

Scoring:

The team completes the R-TFI together by using the *R-TFI Scoring Guide* to discuss and come to **consensus** on the final score for each item on a 2-1-0 scale using a *simultaneous and public voting process*. When using this process, respondents are asked to vote (e.g. "Ready, set, vote.") by simultaneously displaying their score: "2 = fully in place," "1 = partially in place," or "0 = not in place." Individual scores can be displayed using fingers or paper/electronic response cards. This approach facilitates participation of all respondents and neutralizes any potential power influences in the assessment.

When there are discrepancies in scores during a vote, members discuss the available evidence to justify a score. After this brief discussion, respondents vote on the item again to help achieve consensus. Consensus means that voters in the minority can live with and support the majority decision on an item. If consensus cannot be reached, the facilitator encourages further discussion at a later time and the majority vote is recorded so that the results can be calculated and graphed.

Data Entry and Analysis:

Scores for each R-TFI item are entered into the MiBLSi database at http://webapps.miblsimtss.org/midata. Results can then be viewed in an R-TFI item report, in the Analysis of School-Wide Data Report, District Dashboard, and ISD Dashboard.

Teams may choose to meet for a longer period of time to prioritize areas for improvement and plan related activities. Alternatively, a **School Leadership Team** may wish to schedule another meeting focused primarily on action planning. Teams should interpret their R-TFI data starting with the total score, then look for more specific areas of strength and need based on tier and subscale scores (i.e., Tier 1, Tier 2, and Tier 3, Teams, Implementation, Resources, Evaluation). Finally, the team can use individual item scores from low-scoring subscales to identify actions that will lead to improved implementation of a School-Wide Reading Model.

Reading Tiered Fidelity Inventory (R-TFI) Elementary-Level Edition Scoring Form

| Date: |

| 3.11There is a protocol to monitor the fidelity of Tier 3 interventions. | For each intensive reading intervention group, the school gathers data on all of the following: • Student attendance. • Actual intervention duration. • Actual intervention frequency. • Implementation quality (e.g., direct observation by a qualified individual, self-report). | For each intensive reading intervention group, the school gathers data on all of the following: • Student attendance. • Actual intervention duration. • Actual intervention frequency. | The school does not collect fidelity data for any Tier 3 intervention. OR- For each intensive reading intervention group, the school gathers only one or two of the data sources outlined in the 2-point response. | Intervention Log that documents items outlined in the 2-point criteria |
| 3.12 Intensive reading intervention plans are adjusted based on decision rules. | The appropriate school team (e.g. Grade-Level Team, Student Support Team) uses established decision rules to maintain, adapt, modify, and improve support for students receiving intensive reading intervention. -AND-Decisions are made as soon as data indicate an adjustment is needed (e.g., maintain intervention plan, change student incentives, provide more instructional coaching, change student program placement). | The appropriate school team (e.g. Grade-Level Team, Student Support Team) uses established decision rules to maintain, adapt, modify, and improve support for students receiving intensive reading intervention. | The appropriate school team (e.g. Grade-Level Team, Student Support Team) does not use established decision rules to adapt, modify, and improve support for students receiving intensive reading intervention. | Progress monitoring of intensive intervention plans Decision rules |

Glossary of Terms

Adequate Time. Suggested time allocation to effectively teach the critical reading skills using a combination of whole-group and small-group differentiated reading instruction. Although other content areas (e.g., writing) may be integrated with reading, if done so during the 90-minute block, it should be for the purpose of supporting reading instruction. An example would be writing a summary in response to reading a story for the purpose of supporting the comprehension of the text read. A non-example would be teaching the process of writing a summary, which should occur during the designated time for writing instruction. Integration of the other content areas should not take away from the instructional minutes devoted specifically to developing successful readers.

Big Ideas of Reading. Research validated skills of phonemic awareness, alphabetic principle, fluency, vocabulary and comprehension that are necessary for students to be successful readers (commonly referred to as the "Five Big Ideas" and the "Five Essential Components of Reading").

Class-Wide Expectations. A list of positively stated behaviors that are desired of all students in classroom settings.

Consensus. A decision in which everyone participates and with which everyone can live with and support.

Core Reading Program. Program(s) and materials *all* students have access to during Tier 1 reading instruction.

Curriculum Programs and Materials. Lessons and additional academic content used to teach reading instruction at each grade level.

Data-Based Decision-Making. An on-going process of analyzing and evaluating information to inform important instructional decisions.

Decision Rules. Pre-determined set of guidelines that produce answers that can be applied at a single point in time.

Diagnostic Assessment. Assessment and other data collected, as needed, for additional information on student reading performance on specific reading skills to assist in problem solving when student performance is less than desired.

Differentiated Supports. Varying instructional delivery and scaffolds based on student needs in order to support accuracy of student responding in the acquisition of new skills and review of existing skills.

Evidence-based. A program, strategy or activity-set that has been documented in peer-reviewed journals as effective for a specific population through research methodology.

Fidelity. Information that describes how well a practice, program or strategy is implemented (e.g., fidelity, implementation stage).

Grade-Level Teams. Teams comprised of all teachers from the same grade level along with any additional instructional staff responsible for delivering grade-level core reading and supplemental reading instruction. The team may include an individual(s) with specific reading expertise not assigned to the grade level (e.g., reading specialist).

Hypotheses. An idea that has been suggested as an explanation for something but has not been proven to be true.

Instructional Coaching. Includes a combination of consultation, direct observation, feedback, and modeling to teachers and para-educators to improve technical skills as they work to effectively implement a particular practice, program or strategy in the classroom setting.

Instructional Plan. A document developed during a grade-level meeting that matches students within the grade level to the right intensity and type of instruction using universal screening data as a starting point. The plan addresses the students' present level of performance and outlines the critical reading skill that will be the initial focus for each group of students with similar needs, program(s) and materials that will be used for each group, frequency of the use of the program(s) and materials, progress monitoring expectations, and the person responsible for monitoring the implementation of the plan.

Intensive Reading Intervention Plan. A document developed during Student Support Team meetings that identifies the specific components of an intervention plan developed for an individual student based on the specific needs identified for the student. The plan addresses the student's present level of performance, outlines S.M.A.R.T. goal(s) that the intervention will target, the program(s) and materials that will be used to support the student, the frequency of the intervention, progress monitoring expectations, how fidelity will be assessed and the person responsible for the implementation of the plan. The plan also includes specific decision rules for determining the effectiveness of the intervention as well as a timeline for reviewing progress.

Intervention Variables. Specific components of an intervention plan that can be modified in order to increase the intensity of the intervention plan. Variables include time for intervention, group size, frequency of intervention, opportunities to learn, materials, and coordination of instruction.

Precise Problem Statements. Include specific information to outline what the problem is, where it occurred, when it occurred, who was involved, and why might it have happened.

Procedures. A set of expected behaviors taught to students for common classroom tasks and activities. For example, students may be taught the procedure for gaining the teacher's attention during independent work time (e.g., place a book upright on your desk and keep working on your task) or what they should do when the bell rings at the end of a class period (e.g., quietly place materials away and stay seated until you are dismissed). Examples of common tasks and activities include: transitions, gaining student attention, collecting homework, passing out/collecting materials, signaling for choral or partner responses, asking for assistance, submitting assignment.

Professional Learning. Deliberate approach to increasing teachers', school staffs' and administrators' effectiveness in improving outcomes for students.

Progress Monitoring. Frequent assessment to examine a student's rate of progress on specific skills in order to guide decisions regarding the effectiveness of reading intervention programs, as well as assisting in moving students within reading instructional groups.

Quality Evidence. Independent randomized controlled studies that demonstrate improvements in targeted skills the intervention claims to improve and studies that were conducted using a similar student demographic as the district who is seeking to adopt the intervention.

R.I.O.T. (Review, Interview, Observe, and Test). Procedures for gathering information necessary to explain student academic or behavioral problems.

S.M.A.R.T. Goal. A general statement of an intended outcome that aligns with the critical reading skills that are a high priority for the school, a specific grade level and/or students who are functioning below grade level. The goal is SMART: specific, measureable, attainable, realistic and timely.

School Leadership Team. The function of the School Reading Leadership Team is to ensure sustainable systems and structures are in place to facilitate effective and efficient reading instruction for all levels of learners. This includes achievement and fidelity assessments, allocated time for instruction, materials and resources, targeted professional development, coaching, feedback and support systems, and data-based problem solving processes at all levels. Additionally, the leadership team coordinates these efforts with other priorities.

School-Wide Reading Assessments. Reading assessments that include universal screening, diagnostic, and progress monitoring measures.

School-Wide Reading Model. Multi-tiered structures encompassing: (1) data use and analysis; (2) systems to address the continuum of reading needs across the student body; and (3) evidence-based practices focused on the Big Ideas of Reading designed to improve reading outcomes for all students.

School-Wide Reading Plan. A document created annually that details the administrative and teaching staff activities needed to provide adequate instructional supports to all of the students in the school. Activities may involve actions such as aligning reading objectives to state standards, professional learning, purchasing new evidence-based materials, creating grade level teams, establishing/changing reading schedules, etc. The plan should be based on the results of student assessment results, fidelity results, discussions of the school's implementation capacity and, if available, system-level coaching feedback. It should also be monitored at least three times a year by the School Leadership Team and be aligned with the School Improvement Plan.

School-wide Universal Screening Assessment Schedule. A document that outlines a schedule for collecting universal screening data, entering data, and generating reports for each measure included in the School-wide Assessment Audit.

Scientifically-Vetted/Peer Reviewed. A term related to quality control that refers to having research that is closely examined by a panel of reviewers who are experts in the topic. The review includes an examination of the quality of the research methods and the contribution to the existing literature base.

State Standards. Educational standards approved by the State Board of Education and/or State Department of Education.

Student Support Teams. Group of individuals whose role is to ensure students are able to be successful in the school environment. The team works collaboratively to implement a particular intensive plan of support that depending on the student's needs may include both academic and behavioral components. Team members can be a combination of school/district staff, parents, and/or individuals from outside agencies (e.g., Community Mental Health).

System Fidelity Data. Assessment information regarding how well components of a system are implemented.

System-Level Coaching. Coaching a team to improve the quality and effectiveness of the team in developing systems to support the implementation of practices and data analysis to determine the effectiveness of the systems implemented. Staff at the school, district or Intermediate School District (ISD) level can provide the system-level coaching.

Technical Adequacy. Examines the reliability and **validity** of a measure.

Tier 1. System that ensures all students have access to and benefit from the core reading curriculum which includes: (1) high quality, evidence-based instruction that is differentiated to address the continuum of reading needs across all students; (2) universal screening on a periodic basis to measure the impact of the core reading curriculum and instruction; and (3) to assess student reading performance.

Tier 2. System that ensures students who are not making adequate progress in the core reading curriculum are provided with evidence-based, supplemental instruction matched to their needs on the basis of levels of performance and rates of progress.

Tier 3. System that ensures students who have the most intensive needs in reading have access to and benefit from individualized, intensive interventions that that targets students' skill deficits for the remediation of existing problems and the prevention of more severe problems.

Universal Screening. Systematic assessment of *all* students within a school or district, on academic and/or social-emotional indicators for the purpose of identifying students who may require additional support.

Validity. The extent to which a measurement tool measures what it is intended to measure.
