

524 INTERNET ACCEPTABLE USE AND SAFETY POLICY

[Note: Education districts are required by statute to have a policy addressing these issues.]

I. PURPOSE

The purpose of this policy is to set forth policies and guidelines for access to the education district computer system and acceptable and safe use of the Internet, including electronic communications.

II. GENERAL STATEMENT OF POLICY

In making decisions regarding student and employee access to the education district computer system and the Internet, including electronic communications, the education district considers its own stated educational mission, goals, and objectives. Electronic information research skills are now fundamental to preparation of citizens and future employees. Access to the education district computer system and to the Internet enables students and employees to explore thousands of libraries, databases, bulletin boards, and other resources while exchanging messages with people around the world. The education district expects that faculty will blend thoughtful use of the education district computer system and the Internet throughout the curriculum and will provide guidance and instruction to students in their use.

III. LIMITED EDUCATIONAL PURPOSE

The education district is providing students and employees with access to the education district computer system, which includes Internet access. The purpose of the system is more specific than providing students and employees with general access to the Internet. The education district system has a limited educational purpose, which includes use of the system for classroom activities, educational research, and professional or career development activities. Users are expected to use Internet access through the district system to further educational and personal goals consistent with the mission of the education district and education policies. Uses which might be acceptable on a user's private personal account on another system may not be acceptable on this limited-purpose network.

IV. USE OF SYSTEM IS A PRIVILEGE

The use of the education district system and access to use of the Internet is a privilege, not a right. Depending on the nature and degree of the violation and the number of previous violations, unacceptable use of the education district system or the Internet may result in one or more of the following consequences: suspension or cancellation of use or access privileges; payments for damages and repairs; discipline under other appropriate education district policies, including suspension, expulsion, exclusion, or termination of employment; or civil or criminal liability under other applicable laws.

V. UNACCEPTABLE USES

- A. While not an exhaustive list, the following uses of the education district system and Internet resources or accounts are considered unacceptable:
 - 1. Users will not use the education district system to access, review, upload, download, store, print, post, receive, transmit, or distribute:
 - a. pornographic, obscene, or sexually explicit material or other visual

- depictions that are harmful to minors;
- b. obscene, abusive, profane, lewd, vulgar, rude, inflammatory, threatening, disrespectful, or sexually explicit language;
 - c. materials that use language or images that are inappropriate in the education setting or disruptive to the educational process;
 - d. information or materials that could cause damage or danger of disruption to the educational process;
 - e. materials that use language or images that advocate violence or discrimination toward other people (hate literature) or that may constitute harassment or discrimination.
2. Users will not use the education district system to knowingly or recklessly post, transmit, or distribute false or defamatory information about a person or organization, or to harass another person, or to engage in personal attacks, including prejudicial or discriminatory attacks.
 3. Users will not use the education district system to engage in any illegal act or violate any local, state, or federal statute or law.
 4. Users will not use the education district system to vandalize, damage, or disable the property of another person or organization, will not make deliberate attempts to degrade or disrupt equipment, software, or system performance by spreading computer viruses or by any other means, will not tamper with, modify, or change the education district system software, hardware, or wiring or take any action to violate the education district's security system, and will not use the education district system in such a way as to disrupt the use of the system by other users.
 5. Users will not use the education district system to gain unauthorized access to information resources or to access another person's materials, information, or files without the implied or direct permission of that person.
 6. Users will not use the education district system to post private information about another person, personal contact information about themselves or other persons, or other personally identifiable information, including, but not limited to, addresses, telephone numbers, school addresses, work addresses, identification numbers, account numbers, access codes or passwords, labeled photographs, or other information that would make the individual's identity easily traceable, and will not repost a message that was sent to the user privately without permission of the person who sent the message.

[Note: Education districts should consider the impact of this paragraph on present practices and procedures, including, but not limited to, practices pertaining to employee communications, school or classroom websites, and student/employee use of social networking websites. Depending upon education district policies and practices, education districts may wish to add one or more of the following clarifying paragraphs.]

- a. This paragraph does not prohibit the posting of employee contact information on education district webpages or communications between employees and other individuals when such communications are made for education-related purposes (i.e., communications with parents or other staff members related to students).
- b. Employees creating or posting education district-related webpages

may include personal contact information about themselves on a webpage. However, employees may not post personal contact information or other personally identifiable information about students unless:

- (1) such information is classified by the education district as directory information and verification is made that the education district has not received notice from a parent/guardian or eligible student that such information is not to be designated as directory information in accordance with Policy 515; or
- (2) such information is not classified by the education district as directory information but written consent for release of the information to be posted has been obtained from a parent/guardian or eligible student in accordance with Policy 515.

In addition, prior to posting any personal contact or personally identifiable information on a education district-related webpage, employees shall obtain written approval of the content of the postings from the building administrator.

- c. These prohibitions specifically prohibit a user from utilizing the education district system to post personal information about a user or another individual on social networks, including, but not limited to, social networks such as "Facebook," "Twitter," "Instagram," "Snapchat," "TikTok," "Reddit," and similar websites or applications.
7. Users must keep all account information and passwords on file with the designated education district official. Users will not attempt to gain unauthorized access to the education district system or any other system through the education district system, attempt to log in through another person's account, or use computer accounts, access codes, or network identification other than those assigned to the user. Messages and records on the education district system may not be encrypted without the permission of appropriate education district authorities.
 8. Users will not use the education district system to violate copyright laws or usage licensing agreements, or otherwise to use another person's property without the person's prior approval or proper citation, including the downloading or exchanging of pirated software or copying software to or from any education district computer, and will not plagiarize works they find on the Internet.
 9. Users will not use the education district system for conducting business, for unauthorized commercial purposes, or for financial gain unrelated to the mission of the education district. Users will not use the education district system to offer or provide goods or services or for product advertisement. Users will not use the education district system to purchase goods or services for personal use without authorization from the appropriate education district official.
 10. Users will not use the education district system to engage in bullying or cyberbullying in violation of the education district's Bullying Prohibition Policy. This prohibition includes using any technology or other electronic communication off education district premises to the extent that student learning or the school environment is substantially and materially disrupted.

- B. The education district has a special interest in regulating off-campus speech that materially disrupts classwork or involves substantial disorder or invasion of the rights of others. A student or employee engaging in the foregoing unacceptable uses of the Internet when off education district premises also may be in violation of this policy as well as other education district policies. Examples of such violations may include, but are not limited to, serious or severe bullying or harassment targeting particular individuals, threats aimed at teachers or other students, failure to follow rules concerning lessons, the writing of papers, the use of computers, or participation in other online education district activities, and breaches of education district security devices. If the education district receives a report of an unacceptable use originating from a non-school computer or resource, the education district may investigate such reports to the best of its ability. Students or employees may be subject to disciplinary action for such conduct, including, but not limited to, suspension or cancellation of the use or access to the education district computer system and the Internet and discipline under other appropriate education district policies, including suspension, expulsion, exclusion, or termination of employment.
- C. If a user inadvertently accesses unacceptable materials or an unacceptable Internet site, the user shall immediately disclose the inadvertent access to an appropriate education district official. In the case of an education district employee, the immediate disclosure shall be to the employee's immediate supervisor and/or the building administrator. This disclosure may serve as a defense against an allegation that the user has intentionally violated this policy. In certain rare instances, a user also may access otherwise unacceptable materials if necessary to complete an assignment and if done with the prior approval of and with appropriate guidance from the appropriate teacher or, in the case of an education district employee, the building administrator.

VI. FILTER

[Note: Pursuant to state law, education districts are required to restrict access to inappropriate materials on school computers with Internet access. Education districts seeking technology revenue pursuant to Minnesota Statutes section 125B.26 or certain federal funding, such as e-rate discounts, for purposes of Internet access and connection services and/or receive funds to purchase Internet accessible computers are subject to the federal Children's Internet Protection Act, effective in 2001. Those districts are required to comply with additional standards in restricting possible access to inappropriate materials. Therefore, education districts should select one of the following alternative sections depending upon whether the education district is seeking such funding and the type of funding sought.]

ALTERNATIVE NO. 3

[Note: Education districts that receive certain federal funding, such as e-rate discounts, for purposes of Internet access and connection services and/or receive funds to purchase Internet accessible computers are subject to the federal Children's Internet Protection Act, effective in 2001. This law requires education districts to adopt an Internet safety policy that contains the provisions set forth below. Also, the Act requires such education districts to provide reasonable notice and hold at least one public hearing or meeting to address the proposed Internet safety policy prior to its implementation. Education districts that do not seek such federal financial assistance need not adopt the alternative language set forth below nor meet the requirements with respect to a public meeting to review the policy. The following alternative language for education districts that seek such federal financial assistance satisfies both state and federal law requirements.]

- A. With respect to any of its computers with Internet access, the education district will monitor the online activities of both minors and adults and employ technology protection measures during any use of such computers by minors and adults. The technology protection measures utilized will block or filter Internet access to any visual

depictions that are:

1. Obscene;
 2. Child pornography; or
 3. Harmful to minors.
- B. The term "harmful to minors" means any picture, image, graphic image file, or other visual depiction that:
1. Taken as a whole and with respect to minors, appeals to a prurient interest in nudity, sex, or excretion; or
 2. Depicts, describes, or represents, in a patently offensive way with respect to what is suitable for minors, an actual or simulated sexual act or sexual contact, actual or simulated normal or perverted sexual acts, or a lewd exhibition of the genitals; and
 3. Taken as a whole, lacks serious literary, artistic, political, or scientific value as to minors.
- C. Software filtering technology shall be narrowly tailored and shall not discriminate based on viewpoint.
- D. An administrator, supervisor, or other person authorized by the Executive director may disable the technology protection measure, during use by an adult, to enable access for bona fide research or other lawful purposes.
- E. The education district will educate students about appropriate online behavior, including interacting with other individuals on social networking websites and in chat rooms and cyberbullying awareness and response.

[Note: Although education districts are not required to adopt the more restrictive provisions contained in either Alternative No. 2 or No. 3 if they do not seek state or federal funding, they may choose to adopt the more restrictive provisions as a matter of education district policy.]

VII. CONSISTENCY WITH OTHER EDUCATION DISTRICT POLICIES

Use of the education district computer system and use of the Internet shall be consistent with education district policies and the mission of the education district.

VIII. LIMITED EXPECTATION OF PRIVACY

- A. By authorizing use of the education district system, the education district does not relinquish control over materials on the system or contained in files on the system. Users should expect only limited privacy in the contents of personal files on the education district system.
- B. Routine maintenance and monitoring of the education district system may lead to a discovery that a user has violated this policy, another education district policy, or the law.
- C. An individual investigation or search will be conducted if education district authorities have a reasonable suspicion that the search will uncover a violation of law or education district policy.
- D. Parents may have the right at any time to investigate or review the contents of their child's files and e-mail files in accordance with the education district's Protection and

Privacy of Pupil Records Policy. Parents have the right to request the termination of their child's individual account at any time.

- E. Education district employees should be aware that the education district retains the right at any time to investigate or review the contents of their files and e-mail files. In addition, education district employees should be aware that data and other materials in files maintained on the education district system may be subject to review, disclosure, or discovery under Minnesota Statutes chapter 13 (Minnesota Government Data Practices Act).
- F. The education district will cooperate fully with local, state and federal authorities in any investigation concerning or related to any illegal activities or activities not in compliance with education district policies conducted through the education district system.

IX. INTERNET USE AGREEMENT

- A. The proper use of the Internet, and the educational value to be gained from proper Internet use, is the joint responsibility of students, parents, and employees of the education district.
- B. This policy requires the permission of and supervision by the education district's designated professional staff before a student may use an education district account or resource to access the Internet.
- C. The Internet Use Agreement form for students must be read and signed by the user, the parent or guardian, and the supervising teacher. The Internet Use Agreement form for employees must be signed by the employee. The form must then be filed at the education district office. As supervising teachers change, the agreement signed by the new teacher shall be attached to the original agreement.

X. LIMITATION ON EDUCATION DISTRICT LIABILITY

Use of the education district system is at the user's own risk. The system is provided on an "as is, as available" basis. The education district will not be responsible for any damage users may suffer, including, but not limited to, loss, damage, or unavailability of data stored on education district diskettes, tapes, hard drives, or servers, or for delays or changes in or interruptions of service or misdeliveries or nondeliveries of information or materials, regardless of the cause. The education district is not responsible for the accuracy or quality of any advice or information obtained through or stored on the education district system. The education district will not be responsible for financial obligations arising through unauthorized use of the education district system or the Internet.

XI. USER NOTIFICATION

- A. All users shall be notified of the education district policies relating to Internet use.
- B. This notification shall include the following:
 - 1. Notification that Internet use is subject to compliance with education district policies.
 - 2. Disclaimers limiting the education district's liability relative to:
 - a. Information stored on education district diskettes, hard drives, or servers.
 - b. Information retrieved through education district computers,

networks, or online resources.

- c. Personal property used to access education district computers, networks, or online resources.
 - d. Unauthorized financial obligations resulting from use of education district resources/accounts to access the Internet.
3. A description of the privacy rights and limitations of education district sponsored/managed Internet accounts.
 4. Notification that, even though the education district may use technical means to limit student Internet access, these limits do not provide a foolproof means for enforcing the provisions of this acceptable use policy.
 5. Notification that goods and services can be purchased over the Internet that could potentially result in unwanted financial obligations and that any financial obligation incurred by a student through the Internet is the sole responsibility of the student and/or the student's parents.
 6. Notification that the collection, creation, reception, maintenance, and dissemination of data via the Internet, including electronic communications, is governed by Public and Private Personnel Data Policy, and Protection and Privacy of Pupil Records Policy.
 7. Notification that, should the user violate the education district's acceptable use policy, the user's access privileges may be revoked, education district disciplinary action may be taken and/or appropriate legal action may be taken.
 8. Notification that all provisions of the acceptable use policy are subordinate to local, state, and federal laws.

XII. PARENTS' RESPONSIBILITY; NOTIFICATION OF STUDENT INTERNET USE

- A. Outside of school, parents bear responsibility for the same guidance of Internet use as they exercise with information sources such as television, telephones, radio, movies, and other possibly offensive media. Parents are responsible for monitoring their student's use of the education district system and of the Internet if the student is accessing the education district system from home or a remote location.
- B. Parents will be notified that their students will be using education district resources/accounts to access the Internet and that the education district will provide parents the option to request alternative activities not requiring Internet access. This notification should include:
 1. A copy of the user notification form provided to the student user.
 2. A description of parent/guardian responsibilities.
 3. A notification that the parents have the option to request alternative educational activities not requiring Internet access and the material to exercise this option.
 4. A statement that the Internet Use Agreement must be signed by the user, the parent or guardian, and the supervising teacher prior to use by the student.
 5. A statement that the education district's acceptable use policy is available for parental review.

XIII. NOTIFICATION REGARDING TECHNOLOGY PROVIDERS

- A. "Technology provider" means a person who:
 - 1. contracts with the education district, as part of a one-to-one program or otherwise, to provide a education district-issued device for student use; and
 - 2. creates, receives, or maintains educational data pursuant or incidental to a contract with the education district.
- B. "Parent" means a parent of a student and includes a natural parent, a guardian, or an individual acting as a parent in the absence of a parent or a guardian.
- C. Within 30 days of the start of each school year, the education district must give parents and students direct and timely notice, by United States mail, e-mail, or other direct form of communication, of any curriculum, testing, or assessment technology provider contract affecting a student's educational data. The notice must:
 - 1. identify each curriculum, testing, or assessment technology provider with access to educational data;
 - 2. identify the educational data affected by the curriculum, testing, or assessment technology provider contract; and
 - 3. include information about the contract inspection and provide contact information for a school department to which a parent or student may direct questions or concerns regarding any program or activity that allows a curriculum, testing, or assessment technology provider to access a student's educational data.
- D. The education district must provide parents and students an opportunity to inspect a complete copy of any contract with a technology provider.
- E. A contract between a technology provider and the education district must include requirements to ensure appropriate security safeguards for educational data. The contract must require that:
 - 1. the technology provider's employees or contractors have access to educational data only if authorized; and
 - 2. the technology provider's employees or contractors may be authorized to access educational data only if access is necessary to fulfill the official duties of the employee or contractor.
- F. All educational data created, received, maintained, or disseminated by a technology provider pursuant or incidental to a contract with a public educational agency or institution are not the technology provider's property.

XIV. EDUCATION DISTRICT-ISSUED DEVICES

- A. "Education district-issued device" means hardware or software that the education district, acting independently or with a technology provider, provides to an individual student for that student's dedicated personal use. An education district-issued device includes a device issued through a one-to-one program.
- B. Except as provided in paragraph C, the education district or a technology provider must not electronically access or monitor:
 - 1. any location-tracking feature of a education district-issued device;

2. any audio or visual receiving, transmitting, or recording feature of a education district -issued device; or
 3. student interactions with a education district -issued device, including but not limited to keystrokes and web-browsing activity.
- C. The education district or a technology provider may only engage in activities prohibited by paragraph B if:
1. the activity is limited to a noncommercial educational purpose for instruction, technical support, or exam-proctoring by education district employees, student teachers, staff contracted by the education district, a vendor, or the Minnesota Department of Education, and notice is provided in advance;
 2. the activity is permitted under a judicial warrant;
 3. the education district is notified or becomes aware that the device is missing or stolen;
 4. the activity is necessary to respond to an imminent threat to life or safety and the access is limited to that purpose;
 5. the activity is necessary to comply with federal or state law, including but not limited to Minnesota Statutes section 121A.031; or
 6. the activity is necessary to participate in federal or state funding programs, including but not limited to the E-Rate program.
- D. If the education district or a technology provider interacts with a education district -issued device as provided in paragraph C, clause 4, it must, within 72 hours of the access, notify the student to whom the education district -issued device was issued or that student's parent and provide a written description of the interaction, including which features of the device were accessed and a description of the threat. This notice is not required at any time when the notice itself would pose an imminent threat to life or safety, but must instead be given within 72 hours after that imminent threat has ceased.

XV. CELL PHONE USE

1. Students are prohibited from using cell phones and other electronic communication devices during the instructional day. Students also are prohibited from using a cell phone or other electronic communication device to engage in conduct prohibited by education district policies including, but not limited to, cheating, bullying, harassment, and malicious and sadistic conduct.
2. If the education district has a reasonable suspicion that a student has violated an education district policy, rule, or law by use of a cell phone or other electronic communication device, the education district may search the device. The search of the device will be reasonably related in scope to the circumstances justifying the search.
3. Students who use an electronic communication device during the school day and/or in violation of education district policies may be subject to disciplinary action pursuant to the education district's discipline policy. In addition, a student's cell phone or electronic communication device may be confiscated by the education district and, if applicable, provided to law enforcement. Cell phones or other electronic communication devices that are confiscated and retained by the education district will be returned in accordance with education district building procedures.

[Note: This language aligns with the provisions found in the MSBA Model Student Handbook. As an alternative to stating specific cell phone rules in an education district policy, an education district board could choose to direct education district administration to establish cell phone rules. This approach enables administrators to craft flexible and specific rules that are specific to grade levels and buildings.]

XVI. LIMIT ON SCREEN TIME FOR CHILDREN IN PRESCHOOL AND KINDERGARTEN

A child in a publicly funded preschool or kindergarten program may not use an individual-use screen, such as a tablet, smartphone, or other digital media, without engagement from a teacher or other students. This section does not apply to a child for whom the school has an individualized family service plan, an individualized education program, or a 504 plan in effect.

XVII. IMPLEMENTATION; POLICY REVIEW

- A. The education district administration may develop appropriate user notification forms, guidelines, and procedures necessary to implement this policy for submission to the education district board for approval. Upon approval by the education district board, such guidelines, forms, and procedures shall be an addendum to this policy.
- B. The administration shall revise the user notifications, including student and parent notifications, if necessary, to reflect the adoption of these guidelines and procedures.
- C. The education district Internet policies and procedures are available for review by all parents, guardians, staff, and members of the community.
- D. Because of the rapid changes in the development of the Internet, the education district board shall conduct an annual review of this policy.
